EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Mr. David Ovedovitz on 8/25/05.

3. The application has been amended as follows:

In The Claims:

In claim 1, line 8, insert - - with a detecting device - - between "detecting" and "that".

In claim 2, line 11, insert - - with a detecting device - - between "detecting" and "that".

4. Claims 1-14 are allowed.

5. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to suggest the claimed method of manufacturing an optical information recording medium, particularly the combination of detecting with a detecting device that the radiation cure resin has been diffused towards the first and center bore and then irradiating the whole to the integrated substrates, after the detection step, to cure the radiation cure resin wholly.

Art Unit: 1733

As noted by Applicant, Miyamoto et al teaches a detecting step with a detection device after the resin has already been fully cured and there is no suggestion to switch the order of the detecting and curing steps.

It is noted that the parent patents have been reviewed and there no obviousness type double patenting exists with the presently allowed claims.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
